

Capillia™ @ Dowlow

bringing materials to *life*™

Lafarge Aggregates & Concrete UK is a major supplier of aggregates within the UK and is part of the Lafarge Group – the world leader in building materials.

We take pride in our culture and values, which embody courage, integrity, commitment and consideration for others and place sustainability at the heart of many of our innovations.

Our product offering

Lafarge produces a range of SUDS sub base products to compliment the variety of systems available in the market today. These can be supplied as part of a bespoke system designed specifically to our clients' requirements. Our products meet the Interpave overall BSEN specifications of BSEN 12620 & BSEN 13242, or other declared specifications.

We operate in compliance with EU and national standards and pursue rigorous quality control policies - we now have BES6001 Responsible Sourcing Certificate for all of our production sites and products to Very Good standard.

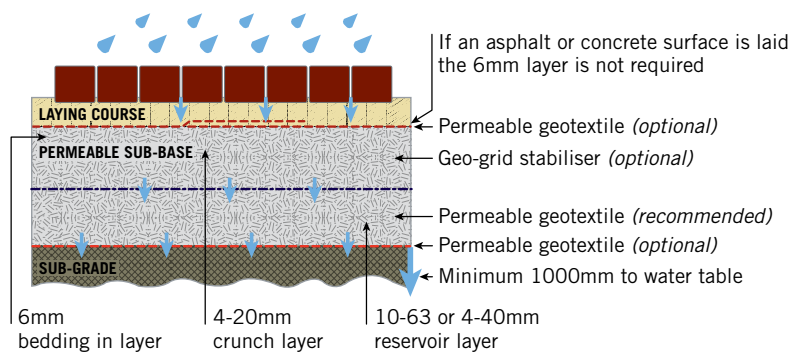

Our sub-base materials offered by Dowlow Quarry are:

Limestone:

- 2-6mm
- 4-20mm
- 4-40mm
- 10-63mm

The sub-bases are laid in a 150mm-450mm thick layer under a variety of pavement offerings: paving slab, asphalt & concrete. The 2-6mm has dual purpose as this can also be used as brushing-in dust.

Rainfall drains through the pervious pavement and filters into the sub-base, slowly draining into the ground below rather than pooling on the surface.

Product range

2-6mm Limestone

4-20mm Limestone

4-40mm Limestone

10-63mm Limestone

Location map

Lafarge Construction Solutions is a new business developed to offer customers a complete solution in hardscaping, pavements and civil engineering; working alongside clients from project design, to supply and installation.
